Deep Learning: Neural Networks, Agentic AI

Experience

Technical Apprentice – Digital Workplace Team

Feb 2026 – Aug 2026

MUFG Pension & Market Services — Mumbai

- Built and configured Microsoft 365 Copilot agents to automate knowledge-management queries and improve information accessibility across teams.
- Developed Power Automate workflows integrating SharePoint Online, Microsoft Teams, and Exchange Online, reducing manual effort through process automation.
- Designed and maintained SharePoint Online sites and intranet content, improving knowledge organization and collaboration within the Digital Workplace environment.

UI/UX Developer & AI Intern

July 2025 – Oct 2025

Avisys — Pune

- Designed and developed CRM modules to streamline customer interactions and business workflows.

Projects

Room Genie - Automated Room Booking

- Built an AI-powered workplace automation solution integrating Microsoft Teams, Copilot Studio, Power Apps, Power Automate, SharePoint Online, and Exchange Online to streamline room booking, approvals, and facility management workflows

Multilingual News Summarizer (Patented)

- Built a natural language processing pipeline to summarize news articles in both Hindi and English.
- Enabled cross-language summaries using automated translation and text processing workflows.
- Deployed the application on AWS EC2 and integrated backend services for scalable article processing and retrieval.

Synthetic Image Generator

- Built a FastAPI-based application integrating **LangGraph workflows** with **OpenAI & Groq models** for synthetic image dataset generation.

Extracurricular & Leadership

Professional playwright with over a decade of theatre experience, enhancing skills in communication, leadership, teamwork, and creative problem-solving. Wrote and Directed Istri, a full length musical attended by over 400 people.

Active contributor to Majha Ghar Foundation, an NGO in Pune, where I developed and managed a stock management system. This system optimizes resource allocation, tracks inventory levels in real-time, and streamlines the distribution of essential supplies to the underprivileged.
